INNOVATION NETWORK DENMARK

Connecting knowledge to growth

Ministry of Higher Education
and Science

Danish Agency for Science,
Technology and Innovation

We work with...

- Efficient energy solutions
- Cleaner environment and less waste
- Automated production
- Intelligent composites
- Quality in housing and construction
- Better health solutions
- Healthy foods
- Innovative IT-solutions and services
- Intelligent transport
- ... and much more where there is significant growth potential for Danish companies.

What's in it for you when it comes to innovation networks?

- Meet companies, researchers and experts with a wide selection of competencies
- Get inspiration, ideas and new tools for innovation
- Find collaboration partners who add knowledge and value to you
- Cut corners to access international knowledge and collaboration
- Update yourself on the latest technological knowledge and research
- Get help to find financial support for you innovation projects
- Be involved in setting the research and innovation policy agenda

” *It was a mistake that I did not take the time to get involved in an innovation network sooner than I did. Despite the fact that it is time-consuming, it has really paid off.*

Christian Borch
Georg Jensen Damask

” *The innovation network experience has been an eye-opener for our company. We now have at hand a quite unique idea which we would not have generated on our own.*

Jan Christensen
Brand Manager, H. Utoft A/S

” *It's a great way to get to talk to the right people and at the same time a fabulous opportunity to strengthen your professional network and create new links to collaboration.*

Kenneth Præstholt
Superwood®, VIDA Wood DK

Who can be part of it?

The innovation networks are open for all interested companies, organisations and authorities. More than 7000 organisations take part today.

How does it work?

Every network is managed by a professional secretariat responsible for implementing the activities demanded by the network participants. The secretariats ensure that the network participants get access to larger fora as well as specific, professionally focused groups.

Who is behind this?

For the benefit of Danish business communities, the Ministry of Higher Education and Science has approved 22 national innovation networks who promote innovation, collaboration, growth and internationalisation.
